Clean+Clear® Organic Filtration Blocks Biofilm and Saves Time and Money!

Ensure your patients of biofilm-free water lines without chemical use or the hassle of daily chemical tablets.

Eliminates:

- Human error in your biofilm treatment.
- Daily biofilm chemical treatment.
- Need for distilled water, chemicals or tablets; filters your office tap water.

The Clean+Clear WaterSolver dental filter is the answer!

Model: DWB-C point-of-use water filter

- Small – fits any dental chair water bottle
- Quick connection coupling included
- Reduces your cost by 90% versus tablet usage
- 1 filter life = 64 tablets **and** 25 bottles of distilled water

“...tap water and chemical additives are not effective in preventing biofilm.”

– The Journal of Contemporary Dental Practice, August 15, 2002
