

WaterSolver™ with BioBlocker™ Filtration Systems for Dental Applications

What is BioBlocker?

- 100% organic submicron ceramic and activated carbon filtration
- Embedded self-sanitizing agent prevents the growth of bacteria
- Reduces 99.9999% of E. coli bacteria
- Reduces cryptosporidium and giardia
- Clean+Clear WaterSolver with BioBlocker removes or reduces:
 - Sediment
 - Odor
 - Chlorine
 - Cysts
 - Organic contaminants

Model DWB-C Point of Use Water Purification Filter

Assure your patients of biofilm-free water lines without chemical use or the hassle of daily chemical tablets. Model DWB-C can be used in conjunction with the Clean+Clear DW4616-C whole-office system or DS1045-C under-sink water purification system to reduce many harmful contaminants.

Single-source and whole-office 4-Unit models. (16" filters shown on whole-office system. 10" filters also available)

Clean+Clear WaterSolver Filtration System advantages:

- No moving parts
- No electricity needed
- No back flushing required
- No bacteria growth
- No tools required to change filter elements
- No additional water shut off valve required; under-sink models have integrated water shut-off valve

WaterSolver filtration gives you:

- 100% organic filtration media
- FDA cleared
- Saves time and money.
- Eliminates costly tablet usage.
- Eliminates the need for distilled water.
- WaterSolver is easy to install.

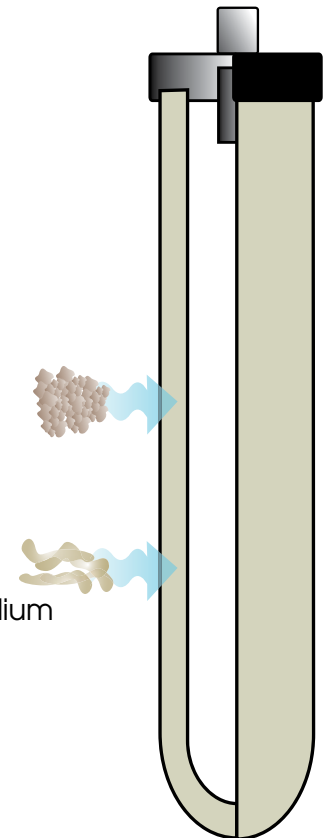

REDUCES OR REMOVES:

Sediment:

- Dirt
- Silt

Microbiological:

- Cryptosporidium
- Giardia

How it Works...

1/4" thick BioBlocker Ceramic Submicron Filtration traps bacteria like E. coli to help protect your patients and staff.

**Go Green.
Go Clean+Clear!**

No wasted water. No electricity.
And no wasted packaging.

“We’ve been using our WaterSolver water filters in our new office for 7 weeks...and we love them. They are easy to install and they make our water delivery routine streamlined and simple!”
